Made so as to suit the requirements of any Band that may be formed; single or double action.

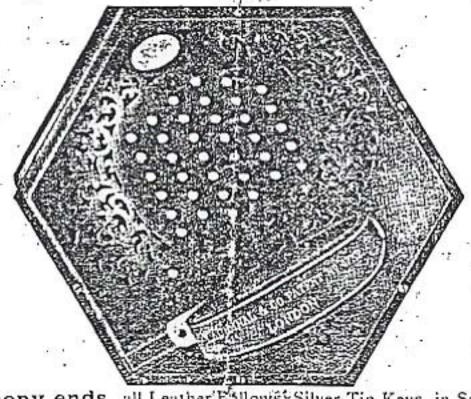

Price according to compass from 21 octaves.

Cachenal & Co's. Duet Patent Concertinas

possess advantages unattained in any other single Musical Instrument; they have a separate Scale on each side, so that a Melody can be played on either; thus the Air can be entirely played on the right hand, leaving the left hand at liberty to play the Accompaniment, similar to the Pianoforte. Every Instrument is Double-Action, sounding the same note either pressing or drawing. The Scale is simply arranged, having the name of each natural note engraved on the front, the flats and sharps being left plain white; thus with the aid of the Instruction Book any person may quickly master the Instrument. The book is so arranged that, with or without a knowledge of music, anyone may soon learn. Professor Maccann can recommend these Instruments for simplicity in learning. The various Testimonials are sufficient to prove the satisfaction they have given each purchaser.
