No. 10b. Same materials and finish as No. 6, but with fifty-six keys, from G on the first line of the Bass Clef to fourth G above. 
18 0 0

Any other Compass to Order.

The disposition of the keys of the above being the same as the Treble Concertina, but sounding an octave lower, those who are already acquainted with the latter can play the former. These Instruments are admirably adapted for Vocal Tenor or Baritone Music, also for taking Viola parts in Trios, Quartets, etc., in addition to which they will not only play a Vocal Bass part, but are capable of performing piano, chords, gliss., etc., written in the Treble Clef, as harmonised for four voices.

**Basses and Double-Basses, according to requirements, also Concertinas and Æolias of the Compass of the Piccolo, all Clarinetts, Bassoon, etc., made to Order.**

Concertinas in No. 6 quality can be made in Amboyna Wood, with Gold-plated fittings, at £2 extra. Any Instrument, from No. 4, can be fitted with SPECIAL COMPOSITION METAL RINGS for Damp and Tropical Climates, without extra charge.

C. W. & Co.'s Improved Square Cases for Treble Concertinas, 12s., 15s., 18s., 24s., & 30s. Ditto, Ditto, for Baritone Concertina, 21s., 32s., & 40s.

Cord and Attachments for supporting the Concertina when playing standing (detachable) 1/6 each.

Tuning Forks, of the standard pitches accurately tuned and tested, 2/6 each.

It is always best to let the Piano Tuner have one of our tested Forks, being preferable to taking the pitch from the Concertina. The three recognised pitches in use are:—Continental C 673 Vibrations; New Philharmonic C 532, and Old Philharmonic C 540. Light Portable Folding Music Stands for Concertina Players, from 6/6; Metronomes, from 21/6.

Warren's Complete Instructions for the Concertina is the best and easiest book to teach and learn from. Price 6s. Nett.

A New Catalogue of Concertina Music may be had post free for 2d. Stamp.

Money Orders to be made payable at G.P.O., London, and crossed. Cheques to be crossed “Westminster Bank, Ltd.”
THE "ÆOŁA." New Octagona.

"WHEATSTONE" CONCERTINA.

"WHEATSTONE" CONCERTINA was invented about the year 1827 by Sir Charles Wheatstone (the inventor of the Electric Telegraph), and having been improved from time to time by Messrs. C. Wheatstone & Co., has now become one of the most perfect, durable, and cheapest of musical instruments.

The "Wheatstone" Concertina has a complete chromatic scale, and possesses qualities which have never hitherto been combined in a single musical instrument. It is equally adapted to the most expressive performance and the most rapid execution, whether confined to the succession of single notes, as most other instruments are, or in harmony of two, three or four parts. From the remarkable simplicity of its fingering, and the great facility with which its tones are produced and sustained, it is very easily learned. An instrument which can play the two complete parts of a difficult violin duet, with very little special study, cannot be other than easy to acquire; and as it cannot be outdone in tune, the most perfect crescendos and diminuendos may be obtained without the large amount of practice which is so requisite on other instruments. The fingering being the same on the Treble, Tenor, Baritone and Bass Concertinas, enable players to take part in Trios, Quartets, Orchestral, or other concerted music, which would be impossible in the case of string or other wind instruments. For example, a violin player cannot play Viola, Cello or Bass without knowledge of each instrument, whereas a Treble Concertina player can play the Tenor or Bass with equal facility. These compassions apply also to the wind instruments, such as Flutes, Clarinets, Bassoons, Oboes, Piccolos, etc.

The Concertina, when played as Obbligato or any other form of accompaniment with the voice, produces a most charming effect; for the Concertina, as an aid to the voice, cannot be equalled by any other instrument.

The performances of Madame Amy Rowbotham, Miss Edith Drake, Miss Eva Taylor, The Faye Four, Messrs. Harry Morton, Charles Rutterford, J. Astley, Olin J. Campbell, W. P. Alderson, C. & T. Campbell (N.Z.), G. Matewowsitz (U.S.A.), the late Signor Giulio Regondi, Messrs. Richard Blagrove, John C. Ward, George Roe, and others, at many concerts during the past and present years, have frequently enabled the musical public to judge of the effects and capabilities of the Concertina. An inspection of the music published will show that, either for solos or accompaniments, it is equal, if not more effective than any other instrument in present use; whilst, in its peculiar effects, and particularly in those of its harmonies, it is unrivalled. The Concertina is capable of performing music written for the Violin, Flute, or any other Orchestral Instruments, besides which many pieces of the highest artistic merit have been expressly composed or written by Micharier, Meloge, Bennet, Walton, Silas, Regondi, Blagrove, and many others. The Concertina produces the same sound whichever way the Bellows is moved, the action of which becomes very similar to that of the bow of the Violin, Violoncello, etc.

The Concertina can take part in quartets, etc., and do its work—as previously suggested—without in any way interfering with the musical interest; in fact, greatly augmenting it. To still further illustrate its great powers of adaptability and sympathy, when used in an Orchestra or Band for the rendering of any special part, it lends itself entirely to that part, sinking its own individuality. For example, it would be absurd to give a Violin part to a Flute, or vice-versa, but the Concertina being assigned, say, a Flute or vice-versa, taking the measure that it has with all that instrument's characteristics.

Messrs. C. W. & Co. May be mentioned that all their Concertinas are tuned on the Equa Temperament system, which is the only recognised method that is used for the pianoforte and all other instruments.

Steel vibrators were first introduced by Messrs. C. W. & Co. in the year 1852, for the use of Signor Giulio Regondi and Mr. Richard Blagrove, and have since then been the severest tests.

All their Concertinas are accurately tuned to the standard pitch, so that sets can be brought together without any trouble to the players. They can also be tuned to any other pitch to suit special requirements. All Messrs. C. W. & Co.'s Concertinas are double action unless otherwise specified. All the instruments are made entirely upon their own premises under personal superintendence, and are of high-priced materials.

THE "ÆOLA."

THIS charming little instrument, now attracting such favourable notice in the musical world, has been placed before the public by Messrs. C. Wheatstone & Co. (the inventors and sole makers) for several years past. It is universally admitted to be the finest tuned musical instrument of the present day, possessing in its scale, the grand qualities of tone proper to a Stradivarius violin, together with a marked resemblance to the human voice.

The recent performances of Madame Amy Rowbotham, Miss Edith Drake, The Faye Four, Mr. John C. Ward, Mr. Richard Blagrove, Mr. Charles Rutterford, Mr. G. Matewowsitz, and other leading Professors have demonstrated the capabilities of the ÆOLA to be far in advance of those of any other portable instrument, and have conclusively proved, whilst it possesses an individuality of tone that is inimitable, it is thoroughly capable of producing and sustaining most of the effects peculiar to stringed instruments, as well as other effects that cannot be produced save by a combination of two or more instruments of other kinds, or by the organ.

The solos and concerted pieces of the great masters written for the violin, flute, etc., can be rendered upon the ÆOLA with greater effect and precision than is ordinarily possible upon their proper instruments, whilst as the keyboard of the ÆOLA is identical with that of Wheatstone's English Concertina, the whole of the important repertoire of the latter is of course available to the player.

The resonant character, and the extreme mellowness and purity of tone of the ÆOLA together with its delicate and expressive touch, combine to recommend the instrument at once to the musical connoisseur as a really sympathetic and legitimate member of the wind instrument family, and one calculated to well repay the trouble of taking up; moreover especially as at the outset it presents to the student incomparably fewer difficulties to overcome than does any other kind of instrument that can be named. For no example is the arrangement of the keyboard, and so easy the fingering, that whilst but slight knowledge of music a beginner, who can devote no more than, say half-an-hour a day, may become able to perform fairly well on the ÆOLA in the course of a few weeks—an achievement utterly impossible with the violin, flute, etc.

The ÆOLA is also invaluable to vocal students when practising, as well as for the leading by themselves obliged accompaniments to their own performance of songs, a feature in which the instrument is unsurpassable save by Wheatstone's Concertina.

The ÆOLA is made with a compass either of three and a half, four, or four and a quarter octaves, and only in one quality, namely the very best. All ÆOLAS are fitted with Messrs. C. W. & Co.'s latest (Concertina & Æola) improvements, including their perfected double screwed notes, spherical keys, and new steel reeds. They are tuned to any pitch required, and with ordinary care will remain in tune many years. Tenor or Bass Æolas also made.
